Hiring Team
Siemens Mobility GmbH
Braunschweig / Berlin, Germany

Dear Hiring Team,

I am writing to express my strong interest in the **Working Student / Intern (f/m/d) – Connectivity and IoT** position at Siemens Mobility. As a Master's student in Computer Engineering at the University of Applied Sciences Nordhausen, with hands-on experience in software development, AI, and IoT, I am excited by the opportunity to contribute to your team working on next-generation diagnostics solutions.

In a recent freelance academic project, I developed an AI-powered diagnostics system using **GenAI** to analyze sensor data and deployed it via edge computing with Python, Docker, and MQTT. This experience allowed me to strengthen my technical skills and improve my collaboration and communication by leading virtual sprint planning and documenting system architecture for a small distributed team.

Previously, I worked for over two years as a React Native and Web Developer, where I built scalable applications, integrated real-time features, and contributed to backend APIs. This role taught me to thrive in fast-paced environments and deliver efficient, user-focused solutions—qualities I'm eager to bring to Siemens Mobility.

I am particularly inspired by Siemens Mobility's commitment to shaping sustainable transportation and smart infrastructure. Being part of an international team that pioneers the future of mobility aligns with my academic focus and professional goals. I am fluent in English and currently learning German (A1.1), and I enjoy collaborating in diverse, hybrid teams.

I am available to start as soon as required and would welcome the opportunity to further discuss how I can support your mission at Siemens Mobility. Thank you very much for considering my application.

Warm regards,

Azeem Sarwar
